Philosophy

Students will attain academic proficiency as defined by local, state, national, and international standards. Students will have multiple opportunities to internalize and demonstrate their understanding of newly acquired information, skills, and processes that are tied to rigorous academic standards and powerful literacy.

The district grading procedures will form a foundation for consistent grading practices. Grades will accurately communicate what students have learned, and each student will be an active participant in learning and assessment processes. Teachers will use various assessments to evaluate the level of student proficiency and to assign grades according to district policy. Therefore, grading practices will be thoroughly understood by administrators, teachers, students and parents.

General Guidelines

All students will be held accountable for the Standards of Learning (SOL) and grades in a manner consistent with the guidelines set forth in this document.

Grades will be based on student achievement in a prescribed time frame. The classroom teacher is responsible for evaluating the academic performance of students and for determining grades. Teachers are expected to use a variety of methods in evaluating students. Teacher-made tests should be appropriate for the subject matter as well as for the age and/or maturity level of the students and should support the SOLs.

Special education students receiving instruction in the general education curriculum are graded as other students unless the IEP indicates alternative grading procedures.

Teachers will clearly describe and communicate (in writing) to both parents and students the criteria used to calculate grades. If a student believes that an error has been made, the student and/or parent may request a grade review.

- Teachers will follow district guidelines for computing quarterly grades. Teachers will follow district curriculum pacing guides.
- Grades will be posted in the electronic gradebook according to guidelines.

NPS Grading Scale: Grades 1-12

The following assessment scale will be used in evaluating and reporting student achievement in the academic skill areas:

Grade	100% Scale	GPA	Definition
Α	93-100	4.0	Designates the status of a student who consistently demonstrates a thorough understanding and skill application
A -	90-92	3.7	in the content area (e.g., SOL and curriculum objectives for the grade/course level).
B+	87-89	3.3	Designates the status of a student who demonstrates a high degree of understanding and skill application in the content
В	83-86	3.0	area (e.g., SOL and curriculum objectives for the grade/course level).
B-	80-82	2.7	
C+	77-79	2.3	Designates the status of a student who demonstrates a satisfactory understanding and skill application in the content
С	73-76	2.0	area (e.g., SOL and curriculum objectives for the grade/course level).
C-	70-72	1.7	
D+	67-69	1.3	Designates the status of a student who needs significant practice and instructional experiences to acquire the
D	64-66	1.0	knowledge of basic content and skills specified in the content area (e.g., SOL and curriculum objectives for the grade/course level).
Е	63 and below	0.0	Designates the status of a student who has not demonstrated the basic knowledge of content and/or skills specified and requires additional practice and instructional experiences in order to succeed (e.g., SOL and curriculum objectives for the grade/course level).

Means for Reporting Grades

Grades will be reported periodically throughout the school year to denote student achievement. Academic grades will reflect student learning/performance in a content area. Work and behavior habits will be reported separately from achievement grades. Teachers will be responsible for providing students and parents with the written criteria by which academic performance will be assessed. This will be provided at the beginning of each year, project, and/or course. Parents can also monitor their student's performance in core content areas electronically through the online gradebook. Additionally, grades will be provided by teachers on a regular basis throughout the instructional process. Grades will be provided on report cards and on informal progress reports as outlined below:

- **Kindergarten**: Students receive 4 report cards per year.
- ➤ Grades 1 5: Students receive 4 informal progress reports and 4 letter-grade report cards.
- ➤ Grades 6 8: Students receive 4 informal progress reports and 4 letter-grade report cards.
- ➤ Grades 9 12: Students receive 4 interim evaluations and 4 letter-grade report cards.

Use of Grades

Grades will not be used to punish or reward students but to reflect student learning. Academic grades will be used to:

- Communicate the teacher's assessment of a student's knowledge of and proficiency in a subject
- Provide a record of student achievement over time
- > Serve as part of the criteria for student promotion to the next grade level
- Provide information for advisement and counseling regarding future course/program selection
- > Provide criteria for honor roll selection
- Provide course credit
- Derive student GPA

Work and behavior assessments will be used to:

- Provide a record of attendance/punctuality, respect for authority, and compliance with school rules
- Provide a record of student preparedness and task performance
- ➤ Align work-related skills to character education
- Provide employers with a broad picture of student performance

Assessment Methods & Strategies for Determining Grades

Performance expectations should be made clear at the beginning of instruction and remain consistent throughout the teaching and learning process. Students' grades are an accurate representation of content mastery only. Grades should be impartial and represent a teacher's professional judgment of performance.

Curriculum guides and companion documents provide assessment and measurement suggestions for evaluating student progress. Evaluation information should be gathered by teachers on a regular basis from a variety of sources to determine a student's level of learning and mastery. The following strategies have proven successful in assessing student performance:

Teacher Observations:

Recording instruments which can assist teachers in systematic, focused data collection on student performance should include but not be limited to:

Anecdotal notes Rubrics/Scoring Guides Checklists

Journal Entries Reading/Writing Portfolios Interviews/Conferences

Running Records Content Portfolios

Student Products:

A performance portfolio which includes samples of student work can show gradual or marked improvement or decline in progress. Samples could include, but not be limited to:

Projects Content Portfolio Presentations Writing Samples Videos Math Applications Journal/Sketchbook Work Samples

Drawings Non-linguistic representation

Teacher-Made Tests/Quizzes:

Both tests and quizzes can provide valuable feedback for making instructional decisions and assessing student progress. Quizzes alert teachers to student readiness for further instruction and/or the need for re-teaching. Formative assessments should focus on the mastery of instructional objectives that have been taught.

Instructional programs or texts that provide ready-made tests should be screened carefully to ensure that they are in line with district curriculum and instructional objectives. Some of these tests may require modification before they can be used to accurately and effectively measure what has been taught.

Posting of Grades

<u>Elementary Level</u> – A <u>minimum</u> of 1 to 2 posted grades per current content every week – not including homework. However, the monitoring of the number and posting of grades will be at the discretion of the building principal.

<u>Secondary Level</u> – A <u>minimum</u> of 1 to 2 posted grades per content every week – not including homework. However, the monitoring of the number and posting of grades will be at the discretion of the building principal.

Homework will be reviewed, marked, and returned within a reasonable period of time (not to exceed **two days** for elementary students and **two to three class periods/meetings/blocks** for secondary).

Building administrators will monitor and give feedback to teachers about their grading practices. The expectation is that grades for assigned work will be posted in a timely manner and that the grades will represent quality work.

Final Grades will be based on a numerical average and fractional grades calculated to the benefit of the student (.5 and above rounded to next higher point).

Grading Parameters

To ensure that grades awarded to students are equitable and consistent across the district content grading parameters are used. The rationale for these parameters is for teachers to use a variety of assessments that promote higher levels of thinking while engaging students in meaningful learning activities

Please note that the examples provided for some categories are intended to be a representative sample only and are not all-inclusive. You may have other examples that fit each category. You are not required to have work samples for every possible example; however, there should be enough work samples to reflect performance accurately in the category as a whole. If you need clarification or assistance contact your principal.

Content coordinators, in collaboration with teacher leaders and department chairs, annually review and update the parameters and weights for assessing student achievement.

PLEASE NOTE: NPS District Common Formative Assessments **ARE NOT** to be calculated into interim, quarterly, or final grades.

Pre-Kindergarten and Kindergarten

Pre-Kindergarten

Pre-kindergarten parents receive a **Prekindergarten Parent Conference Form** in the fall, spring, and at the End-of-Year reflecting progress in the following areas:

- Initiative
- Social Relations
- Creative Representation
- Music and Movement
- Language and Literacy
- Mathematics and Science

Kindergarten

The following assessment codes will be used to evaluate and report student achievement in the academic skill areas:

M	Mastered	The student has successfully demonstrated the skill at least three separate times.
P	Progressing	The student has been introduced to theskill and is still learning and/or practicing. The skill has not yet been evaluated formastery.
N	Needs Improvement	The student has been introduced to the skill and is experiencing difficulty which requires additional assistance.
/	Not Yet Introduced	This skill has not yet been introduced to the child at this time.

The following assessment codes will be used in evaluating and reporting student achievement in the social skills/work habits areas:

S	Satisfactory	The student demonstrates an understanding of the skill and applies it appropriately.
N	Needs Improvement	The student demonstrates some understanding of the skill but applies it inconsistently.
U	Unsatisfactory	The student is not able to apply the skill.

Kindergarten Portfolios

<u>Reading</u>: Teachers will keep e-Portfolio current and communicate the progress with parents. By the end of the year, students must be at an **Independent DRA Level 4.**

<u>Writing</u>: Teachers must place an analytically scored writing sample in portfolio folders each quarter. The other two writing samples go home for parents to review and return. By the end of the year, the students must be at **Stage 3/Phonetic Developmental Stage Benchmark**.

Teachers will follow the NPS Guide to Reading and Writing Instruction and Assessment Document for all portfolio details and parameters.

Informal Progress Reports

Grades 1-2

The assessment codes listed below will be used for the **Informal Progress Report** for **Grades 1-2** and for evaluating and reporting student achievement in the Work-Related Skill Performances. **Note**: These codes are also to be used on the elementary level to assess Physical Education, Music, and Art.

- **O Outstanding--**The student demonstrates high performance.
- **V Very Good--**The student demonstrates above average performance.
- **S Satisfactory--**The student demonstrates average performance.
- **N Needs Improvement--**The student demonstrated below average performance.
- **U Unsatisfactory--**The student demonstrates unacceptable performance.

Grades 3-12

Grades 3-12 will use the previously stated **A, A-, B+, B, B-, C+, C, C-, D+, D, or E** assessment codes for the Informal Progress Report.

 Quarter 1:
 22.5%

 Quarter 2:
 22.5%

 Quarter 3:
 22.5%

 Quarter 4:
 22.5%

Course Final Exam 10.0%

100%

^{*}Middle and high school credit-bearing classes are all full-year courses. The grading parameters listed below indicate the percent worth for different grading categories. The total worth for combined categories per quarter will equal 100%. Each of the four quarter will equal 22.5% of the total grade for the end of the completed course. The final exam, required for credit-bearing courses, will total 10% of the final grade.

Art Grading Parameters

All K-12 art students will use sketchbook processes and keep a sketchbook/journal and portfolio. In grades K-5, individual grades are not assigned to weighted grade categories. All grades are of equal weight. Each 9-weeks the quarter grade should include grades from each category. All students in credit bearing art classes will take a final exam at the end of the year. Portfolio submissions (such as IB or AP) may count as part or all of the performance.

Procedures Governing Make-up Work

All graded assignments will be assigned a numerical grade and will be entered into the electronic gradebook with "Inc" or "Mi" placed in the grade book for any incomplete or missing assignments. Teachers are expected to provide multiple opportunities for students to make-up assignments to avoid assigning zeroes. Principals will ensure these opportunities are provided for all students.

- Students are fully responsible for completing any incomplete or missing assignments (i.e., course assignments, tests, projects and other related work). Teachers are fully responsible for providing the incomplete or missing assignments to the students.
- 2. Students have a maximum of 10 (ten) school days to make-up incomplete or missing work. However, the period of time allowed to make-up work may be extended at the discretion of the principal working with the teacher.
- Teachers will communicate (via telephone, e-mail, or in writing) with students and/or parent/guardian regarding incomplete work, missing assignments, or unsatisfactory course/class work.
- 4. Make-up work completed within the required time frame will be graded and recorded in the grade book by teachers without penalty to students.
- 5. After 10 days, if work is not completed the (Inc) or (Mi) will become a zero grade (0). It is expected that students will make-up incomplete or missing assignments. An incomplete (Inc) or missing (Mi) may not be given as a final grade.

Procedures Governing the Designation of Honor Students

The following procedures should be used in identifying honor roll students and honor graduates in Norfolk Public Schools. These regulations should be applied to <u>all</u> students participating in an approved program of studies.

"A" Honor Roll

Students with grades of "A" or "A-" in all subjects in elementary and middle school and in all credit-bearing courses in senior high school should be placed on the "A" Honor Roll.

"B" Honor Roll

Students with grades of **A**, **A**-, **B**+, **B**, **B**- in all subjects in elementary and middle school and in all credit-bearing courses in high school should be placed on the "B" Honor Roll.

"B Average" Honor Roll

Students with a grade point average of 3.0 with no grade below a **C**- should be placed on the "B" Average Honor Roll.

Honor Graduate

Students must have a minimum grade point average of 3.0 or above to be designated an Honor Graduate.

Homework and Grading

Homework is required at all levels and is assigned a minimum of four nights a week. However, in some content areas homework may not be appropriate. Because homework is an extension of class assignments at an independent level, students should be held accountable for completing homework assignments and given credit for fulfilling the required tasks. Homework should be reviewed, marked, and returned within a reasonable period of time (not to exceed **two days** for elementary students and **two to three class periods/meetings/blocks** for secondary). Homework assignments should be reasonable in length, academically based, and meaningful to student learning. Assignments should not be "busy work".

All homework will be counted. Because of the variety of assignments that may be included as homework, some homework assignments may receive grades and some may receive checks for completion. The way in which homework is evaluated will be based on teacher discretion and should be clearly communicated to parents and students. In order to ensure that grading and accounting for homework assignments will be consistent across the district the following have been developed:

GRADES K-2

Homework will be assigned in accordance with School Board Policy and accounted for but will not be given a letter grade or be used in calculating content grades. Teachers are to use the "Work Related Skill Performance" area of the report card to note a concern or need for improvement.

GRADES 3-5

Homework will be assigned, in accordance with School Board Policy, and students will be held accountable for homework assignments. Teachers will maintain records of homework assignments (e.g., grades and/or frequency of completion). Homework in a particular content area will be included in calculating that content area grade for a 9- week period, and will represent between 5-10% of the 9-week grade. Teachers will also use the "Work Related Skill Performance" area of the report card to note a concern or need for improvement.

Middle / High School

Homework will be assigned, in accordance with School Board Policy, and students will be held accountable for homework assignments. Teachers will maintain records of homework assignments (e.g., grades and/or frequency of completion) Homework in a particular content area of course will be included in calculating that specific grade for the 9-week period and will represent between 5-10% of the 9-week grade. Teachers will also use the "Recommendation Codes" area of the report card to note a concern or need for improvement.

Grading Exceptions

Exceptions:

Certain students with disabilities have **Individual Education Plan (IEP)** teams who have determined that they will be graded according to their progress toward meeting their IEP goals.

English Learners (formerly referred to as ESL or LEP students)

Once **English Learners** (**ELs**) have been determined to be English proficient enough to earn an A, B, C, or D in the content areas, grades should be given using the same criteria required of all students.

However, as long as the level of English proficiency prohibits progress in the content areas, English Learners should be given an "L" (no grade/ESL student) rather than a traditional letter grade. In any case, a student's lack of English proficiency should not be the sole reason a student earns a failing grade.

An ELs proficiency level on the ACCESS for ELLs © test can be used as a **guideline** for determining which type of grade to assign.

English Proficiency Levels (1-5) based on the WiDA ACCESS for ELLs© Test	Guideline for assigning letter grades or "L"
ELs at Levels 1 and 2	Can <i>generally</i> be expected to earn an "L" in their core content courses, but could feasibly earn regular letter grades (A, B, C, etc.) in Math courses or performance based courses such as Music, Physical Education and Art if appropriate accommodations and instructional support is provided.
ELs at level 3	Should be able to earn at least a passing letter grade (D) if the following has a occurred: a. The teacher as engaged the student and appropriate accommodations and scaffolds to instruction have been provided b. The student has attended class and attempted work c. The student is able to demonstrate understanding of content in non-linguistic ways
ELs at levels 4 and 5	Can <i>generally</i> be expected to earn regular letter grades.

<u>High School ELs and Grading:</u> High school teachers need to be particularly judicious when assigning an "L" to a student. An "L" earns the student NO credit for the course.

Placement of Newly Enrolled English Learners:

<u>Kindergarten-Grade 5:</u> English Learners at proficiency levels 1 and 2 will be placed at a grade level as indicated by his/herage.

Grade:	If by October 31 the student's age is:
Kindergarten	5
Grade 1	6
Second 2	7
Grade 3	8
Grade 4	9
Grade 5	10

<u>Middle School:</u> English Learners at proficiency levels 1 and 2 will be placed at a grade level as indicated by his/her age.

<u>Grade</u>	If by October 31 the student's age is:
Grade 6	11
Grade 7	12
Grade 8	13

<u>High School</u>: When transcripts are not available, LEP students will be placed initially in grade 9. This will give them sufficient time to learn English and accumulate the credits required for graduation. They may be promoted to a higher grade upon evidence of progress or receipt of transcripts. Otherwise, promotion will be determined using the same criteria used for all other students.

Frequently, immigrant and refugee students are unable to provide student records or transcripts. Their placement should be made using the guidelines noted above and information pertaining to previous schooling provided by the student or parent/guardian. Adjustments in placement can be made after the student has spent time in class. If you need clarification or assistance contact your principal.
