Booker T. Washington High School

Academy of the Arts

The Academy of the Arts Program is designed to provide students with in-depth exposure to the arts (dance, art, vocal, theatre arts, instrumental and multimedia) through a rigorous, challenging curriculum that will meet the academic, leadership and artistic needs of high school students. Program students are provided opportunities to develop their strategic thinking, problem-solving and leadership skills through an intensive interdisciplinary program of study.

Granby High School

International Baccalaureate Diploma Program

Granby High School is a member of the International Baccalaureate Organization (IBO) and has been authorized to offer the International Baccalaureate Diploma Program since 1998. This program is a two-year “academically challenging and balanced program” intended for juniors and seniors who desire in-depth scholastic preparation for college or university. “It has been designed to address the intellectual, social, emotional, and physical well-being of students. The program has gained recognition and respect from the world’s leading universities” (IBO). Students apply for our preparation program as rising 9th graders. Granby accepts 60 9th graders each year.

Lake Taylor High School

Academy of Leadership and Military Science

The Academy of Leadership and Military Science is a collaborative venture between Norfolk Public Schools and a number of community, private sector, government, higher education, and military agencies. The small learning community of the Academy is comprised of cluster scheduling of all core, foreign language, naval science and leadership classes as well as year-round internships with community partners.

Specialty Programs

Maury High School

The Medical and Health Specialties Program

The Medical and Health Specialties Program at Maury High School is a unique program offering opportunities to highly motivated high school students seriously considering a career in the dramatically expanding fields of medicine and healthcare. Classes are offered on the campuses of Maury High School and Eastern Virginia Medical School and other community sites as program needs dictate.

Norview High School

The Leadership Center for the Sciences and Engineering

The Leadership Center for the Sciences and Engineering (LCSE) is a special learning community within Norview High School, geared for high-achieving students from across the district. LCSE students are enrolled in a four-year rigorous curriculum consisting of honors and Advanced Placement courses, with considerable emphasis in math and science. The program culminates with participation in the innovative AP Capstone® Program, during which students complete a senior research project. This experience provides the independent research, collaborative teamwork, and communication skills valued by colleges and future employers. In addition, LCSE students receive two years of formal instruction and training in leadership development, and contribute to their school and community through extracurricular involvement and volunteer work.

The overall design of the LCSE program guides students towards possible college degrees and careers in science, technology, engineering, and/or math. However, an ultimate goal is to not only graduate students fully prepared to be successful in college, but also equip them with the skills necessary to become effective leaders within our communities.
