

Success Stories:

Internships:

Launched in 2018, SVT Robotics has a singular focus: To develop products that make deployment of automation, robots, and IoT technology quick and easy. Their SOFTBOT® Platform redefines the integration process—eliminating long development cycles and expensive, inflexible custom code—enabling clients to launch complex, multi-system deployments in just weeks. With over 200 years combined industry experience, and even more software development and product experience, SVT Robotics has the perfect team to drive the innovative solutions that will help you advance your business today and be ready for the demands of tomorrow.

Two Southside STEM Academy Scholars were chosen to participate in a paid summer internship with SVT Robotics. Amari Hatfield and Devon Copeland spent the summer learning organizational skills, embracing robotic technologies, and improving their work ethics. These young men agree that this internship was a dynamic experience, and they will forever be grateful for the opportunity to learn and grow in technology.
