

Norfolk Public Schools

The cornerstone of a proudly diverse community

March 16, 2020

Dear Academy Families,

Norfolk Public Schools is providing opportunities for students to continue learning during this period of school closure. Learning packets with multiple lessons and activities for every subject will be available on our schools' website www.npk12.com/aisr. To access these packets, click on the **blue** Learning Plan link on the front page and look in the content folder for the appropriate learning packet. Email your child's teachers for additional information if you should need to. We have hardcopies in the main office as well.

Teachers will hold virtual office hours from 10:00am until 2:00pm each weekday. If you email your teacher(s), they should respond within 24 hours.

In addition to posting the learning packets, teachers have posted assignments and communication on Synergy, Google Classroom, and other vehicles of communication that are unique to their course of study for your convenience. Links to textbooks and other online resources will be uploaded to our school webpage by Tuesday, March 17 @ 3:00pm.

Parents, please encourage students to practice their instruments (vocals too), access Achieve 3000, IXL and keep a writing log of their reading. If your child is in the ID Program, please have them log on to IXL while away to practice their math lessons.

Grab-n-Go meals will be available from 11:00am until 1:00 p.m. beginning Tuesday, March 17th through Friday, March 27th. The following locations will have Grab-n-Go meals: Azalea Garden Middle School, Booker T. Washington High School, Camp Allen Elementary School, Coleman Place Elementary School, James Monroe Elementary School, Lake Taylor School, Norview Elementary School, Oceanair Elementary School, P.B. Young Elementary School, Southside STEM Academy, Suburban Park Elementary School and St. Helena Elementary School.

Please encourage your children to keep a regular study schedule, implement good eating and sleeping habits, and get regular exercise each day to stay energized and healthy.

Sincerely,

Dr. Dorie M. Banks
Principal
