## EXECUTIVE SUMMARY

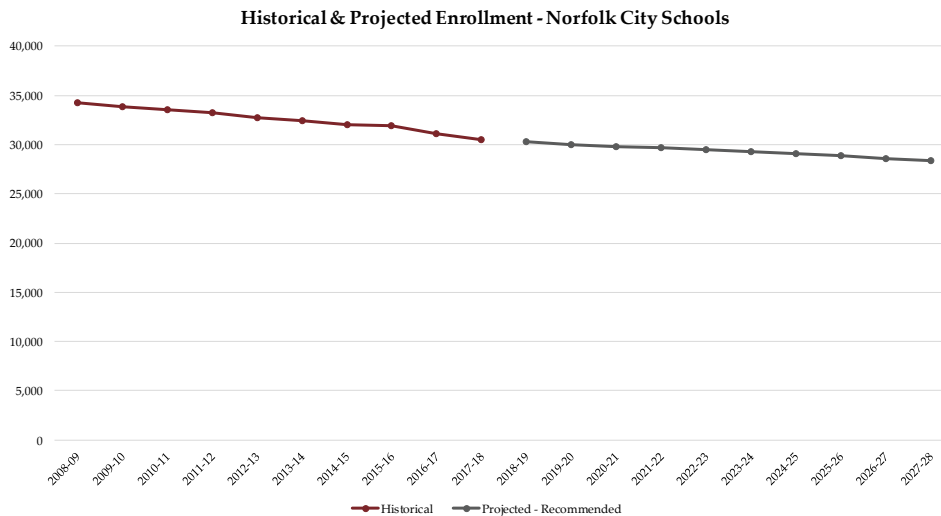

The enrollment projections for the Norfolk Public Schools included in this report were developed using the cohort survival methodology and Cooperative Strategies' custom enrollment projection software, S.T.E.P. [Student Trends & Enrollment Projections]. This custom software was developed in collaboration with The Ohio State University and is based on industry best practices as well as the national experience Cooperative Strategies has with schools, school districts/divisions, and state agencies.

The projections presented in this report are meant to serve as a planning tool for the future, and represent the most likely direction of the Division. Enrollment projections were developed by analyzing the following data:

- Live birth data
- Historical enrollment by attendance boundary, by grade
- Census data
- Building permits

Enrollment in the Norfolk Public Schools has decreased by 3,741 students since the 2008-09 school year. Based on the cohort survival methodology, enrollment is projected to decrease over the next ten years.

As with any projection, the Division should pay close attention to the variables associated with determining enrollment projections discussed in this document. Any one or more of these factors can increase or decrease enrollment within the Norfolk Public Schools. It is recommended that the data contained in this report be reviewed on an annual basis to determine how more recent trends will impact both the enrollment and any new housing development.

## NOTABLE OBSERVATIONS

- Historical PK enrollment does not follow a trend but is based on funding and space availability within the Division. Projected PK enrollment does not follow the cohort survival method but is based on the current 2017-18 PK enrollment of 1,923 students.
- While the number of PK-5 students in the Larchmont Elementary boundary increased by approximately 8% over the last 10 years, it decreased by approximately 4% over the last 5 years.
- While the number of PK-5 students in the Larrymore Elementary boundary decreased by approximately 4% over the last 10 years, it increased by approximately 3% over the last 5 years.
- While the number of students in the Oceanair Elementary boundary decreased by approximately 3% over the last 10 years, it increased by approximately 6% over the last 5 years.
- While the number of students in the Richard Bowling Elementary boundary decreased by approximately 4% over the last 10 years, it increased by approximately 15% over the last 5 years.
- While the number of students in the Taylor Elementary boundary increased by approximately 25% over the last 10 years, it decreased by approximately 6% over the last 5 years.
- While the number of students in the Granby High boundary decreased by approximately 7% over the last 10 years, it increased by approximately 8% over the last 5 years.
- While the number of students in the Maury High boundary decreased by approximately 14% over the last 10 years, it increased by approximately 9% over the last 5 years.
- While the number of students in the Norview High boundary decreased by approximately 9% over the last 10 years, it increased by approximately 1% over the last 5 years.
- On average, the Division's PK-12 enrollment decreased by approximately 1.3% each year over the last 10 years. While K-5 enrollment decreased between approximately 0 and 2.9% each year over the last 10 years; 6-8 enrollment varied between decreasing approximately 2.3% and increasing 1.9% over the last 10 years; and 9-12 enrollment varied between decreasing approximately 4.7% and increasing approximately 1.1% over the last 10 years.

# ENROLLMENT PROJECTION METHODOLOGY

## Introduction

Tracing the landscape of the country's public school enrollment back over the past fifty years reveals demographic, economic, and social changes. The United States as a whole continues to undergo major shifts in public student enrollment, due in large part to past events including the baby boom, the availability and use of birth control, and the development of suburbs. The baby boom of the late 1940s and 50s was followed by the baby bust of the 1960s and 70s. This gave rise to the echo baby boom of the 1980s.

Source: CDC, National Vital Statistics Report

Source: CDC, National Vital Statistics Report

(per 1,000) in 2015.

Nationwide, districts/divisions have experienced the effects of the echo baby bust of the 1990s. From the 1950s to the 1970s, a dramatic downsizing of the family unit occurred. A direct result was the declining school enrollment of the 1970s and 1980s. As of the 2010 Census, the size of a family was at an all-time low of 3.14 persons. The live birth rate increased for the first time in several years in 1998 and increased again in 2000. However, the birth rate resumed a descending pattern in 2001 and reached an all-time low of 12.4

When projecting future enrollments, it is vital to track the number of live births, the amount of new housing activity, and the change in household composition. In addition, any of the following factors could cause a significant change in projected student enrollment:

- Boundary adjustments
- New school openings
- Changes / additions in program offerings
- Preschool programs
- Change in grade configuration
- Interest rates / unemployment shifts
- Intra- and inter-division transfer
- Magnet / charter / private school opening or closure
- Zoning changes
- Unplanned new housing activity
- Planned, but not built, housing
- School voucher programs
- School closures

Obviously, certain factors can be gauged and planned for far better than others. For instance, it may be relatively straightforward to gather housing data from local builders regarding the total number of lots in a planned subdivision and calculate the potential student yield. However, planning for changes in the unemployment rate, and how these may either boost or reduce public school enrollment, proves more difficult. In any case, it is essential to gather a wide variety of information in preparation for producing enrollment projections.

When looking ahead at a school district/division's enrollment over the next two, five, or ten years, it is helpful to approach the process from a global perspective. For example: How many new homes have been constructed each year? How many births have occurred each year in relation to the resident population? Is housing experiencing a turnover—if so, what is the composition of families moving in/out? Are more or less students attending private school or being home-schooled? What has the unemployment rate trend been over the past ten years? What new educational policies are in place that could affect student enrollment figures?

The cohort survival methodology is often used to answer these questions and is standard throughout the educational planning industry. The enrollment projections developed for the Norfolk Public Schools were developed using the cohort survival method.

## Cohort Survival Method

The cohort survival methodology (sometimes referred to as the grade progression ratio method) is a widely used enrollment projection model that is used by many school districts/divisions and state and federal agencies to project K-12 enrollment.

A cohort is a group of persons [in this case, students]. The cohort survival enrollment projection methodology uses historic live birth data and historic student enrollment to “age” a known population or cohort throughout the school grades. For instance, a cohort begins when a group of kindergarteners enrolls in grade K and moves to first grade the following year, second grade the next year, and so on.

A “survival ratio” is developed to track how this group of students increased or decreased in number as they moved through the grade levels. By developing survival ratios for each grade transition [i.e. 2nd to 3rd grade] over a ten year period of time, patterns emerge. A projection ratio for each grade transition is developed based on analysis of the survival ratios. The projections are used as a multiplier in determining future enrollment.

For example, if student enrollment has consistently increased from the 8th to the 9th grade over the past ten years, the survival ratio would be greater than 100% and could be multiplied by the current 8th grade to develop a projection for next year’s 9th grade. This methodology can be carried through to develop ten years of projection figures. Because there is not a grade cohort to follow for students coming into kindergarten, resident live birth counts are used to develop a birth-to-kindergarten survival ratio. Babies born five years previous to the kindergarten class are compared in number, and a ratio can be developed to project future kindergarten enrollments.

The cohort survival method is useful in areas where population is stable [relatively flat, growing steadily, or declining steadily], and where there have been no significant fluctuations in enrollment, births, and housing patterns from year to year. The cohort survival methodology inherently considers the net effects of factors such as migration, housing, dropouts, transfers to and from charter schools, open enrollment, and deaths. This methodology does not assume changes in policies, program offerings, or future changes in housing and migration patterns.

## U.S. CENSUS

According to the U.S. Census Bureau, the population in Norfolk, Virginia increased from 234,403 to 242,803, or approximately 4 percent, between the 2000 and 2010 Census.

In terms of school-aged children [5-19], the population decreased by 5,646, or 11 percent. The under age 5 population decreased from 16,546 to 16,494, or less than 1 percent.

The median age of a Norfolk Virginia resident is 29.7, an increase of 0.1 years since the 2000 Census.

The average household size decreased from 2.45 to 2.43. The average family size decreased from 3.07 to 3.06.

The number of total housing units increased in tandem with the number of occupied and vacant housing units.

The table to the right provides a comparison of the 2000 and 2010 U.S. Census data.

### NORFOLK, VA U.S. CENSUS

Subject	2000	2010
Total population	234,403	242,803
<b>SEX AND AGE</b>		
Male	119,830	125,797
Female	114,573	117,006
Under 5 years	16,546	16,494
5 to 19 years	50,506	44,860
20 to 64 years	141,819	158,653
65 years and over	25,532	22,796
Median age (years)	29.6	29.7
<b>RACE</b>		
One Race	97.5%	96.4%
White	48.4%	47.1%
Black or African American	44.1%	43.1%
American Indian and Alaska Native	0.5%	0.5%
Asian	2.8%	3.3%
Native Hawaiian and Other Pacific Islander	0.1%	0.2%

## GENERAL DEMOGRAPHICS

The following information represents block group estimates and projections created from market research and U.S. Census data obtained from the Environmental Systems Research Institute [ESRI]. ESRI provides a yearly update to their demographic data in increments of five years. To make updates to their demographic data set, they use American Community Survey [ACS] data that takes a series of monthly sample surveys but only from areas with populations of 65,000 or more. One year of ACS data is a period estimate as a twelve-month average, rather than a single point in time.

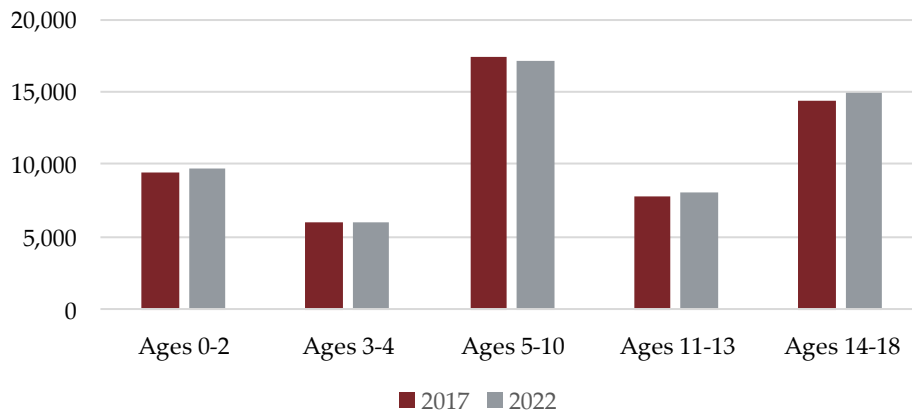

According to the ESRI estimates, the total population of Norfolk, Virginia is projected to increase over the next five years. As illustrated in the table below, the number of children, ages 5-18, is projected to increase by 582 children.

**NORFOLK CITY  
POPULATION ESTIMATES**

Age	2017	2022
Ages 0-2	9,435	9,726
Ages 3-4	6,023	6,066
Ages 5-10	17,372	17,076
Ages 11-13	7,768	8,105
Ages 14-18	14,448	14,989
<b>Ages 5-18</b>	<b>39,588</b>	<b>40,170</b>
<b>Total Population</b>	<b>248,958</b>	<b>253,342</b>

## **NORFOLK PUBLIC SCHOOLS ESTIMATED SCHOOL AGED POPULATION GROWTH 2017-22**

The map on the following page shows school age population change in the U.S. Census block groups within the Norfolk Public Schools boundary. Population changes are based on 2017 and 2022 estimates.

A block group is defined by the U.S. Census Bureau as, “a statistical division of a census tract, generally defined to contain between 600 and 3,000 people and 240 and 1,200 housing units, and the smallest geographic unit for which the Census Bureau tabulates sample data.”

# NPS Elementary Schools & School-Aged Population Change, 2017 to 2022

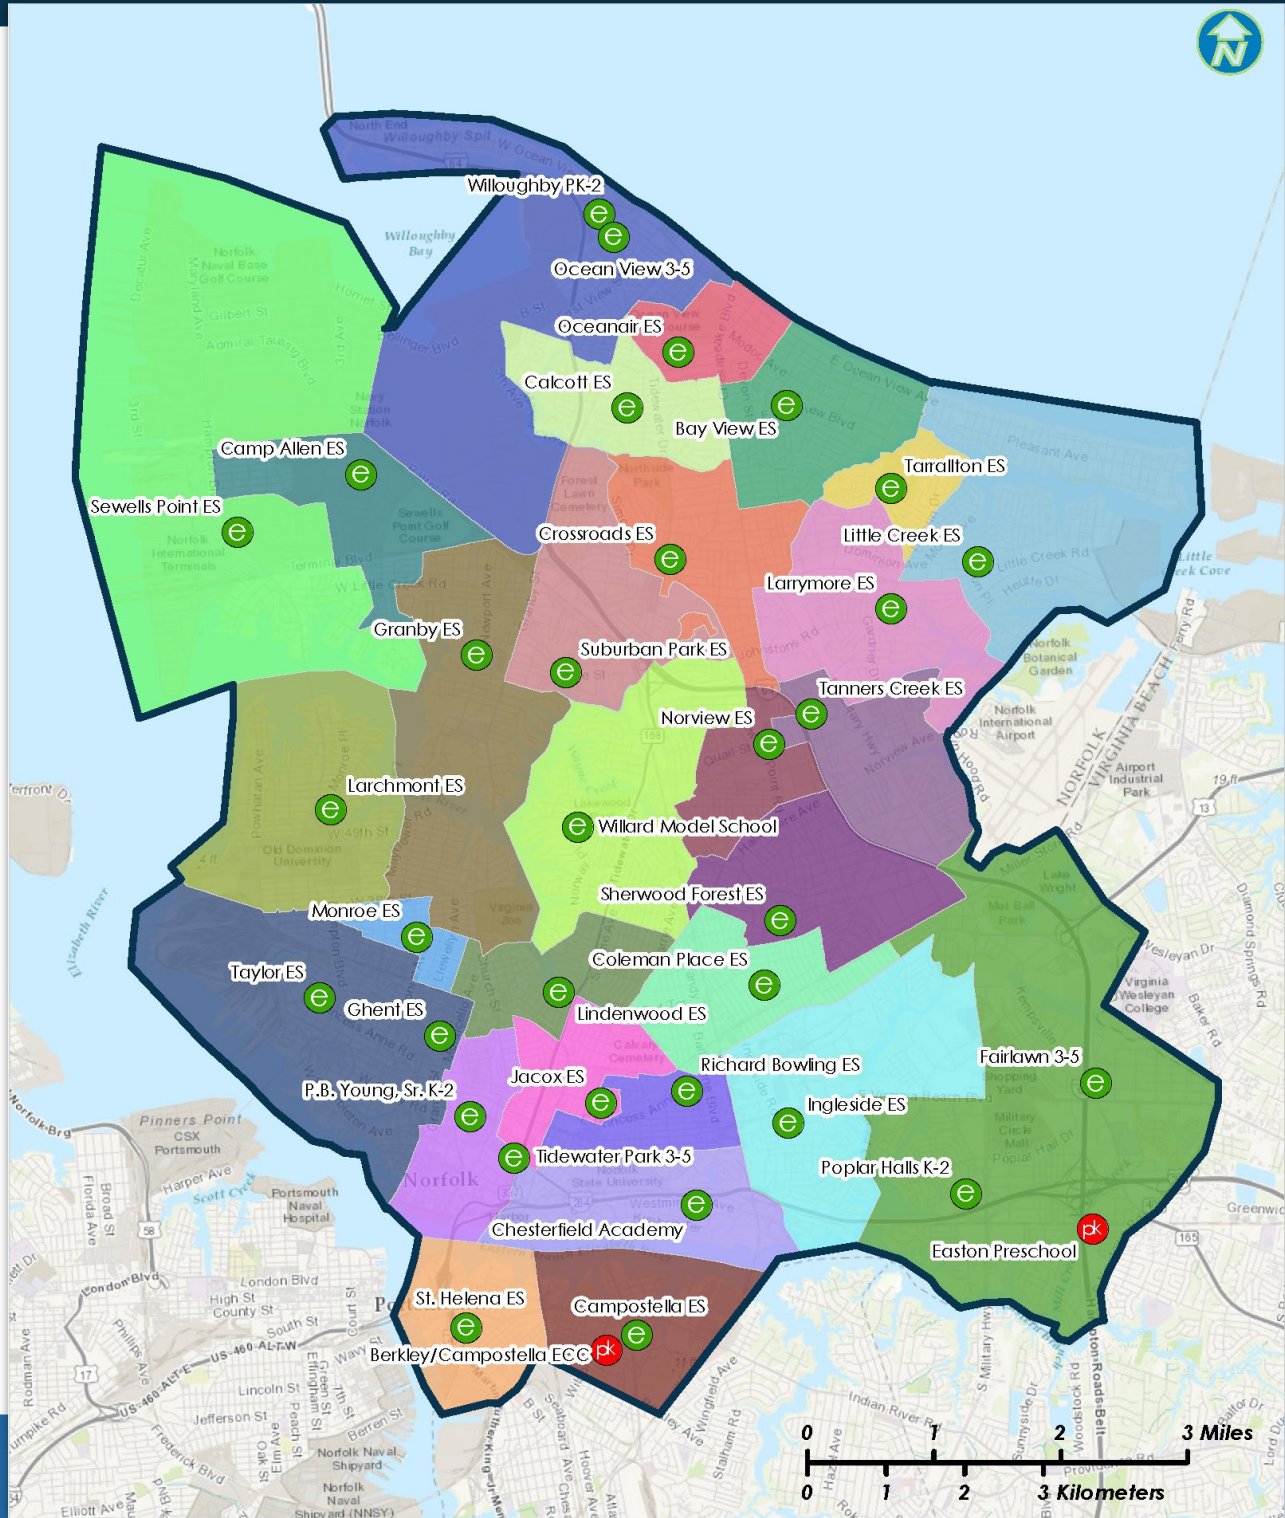

## **NORFOLK PUBLIC SCHOOLS SCHOOL ATTENDANCE BOUNDARIES MAPS**

The maps on the following pages show the Division's current boundary structure followed by the middle school boundary structure for the 2018-19 school year.

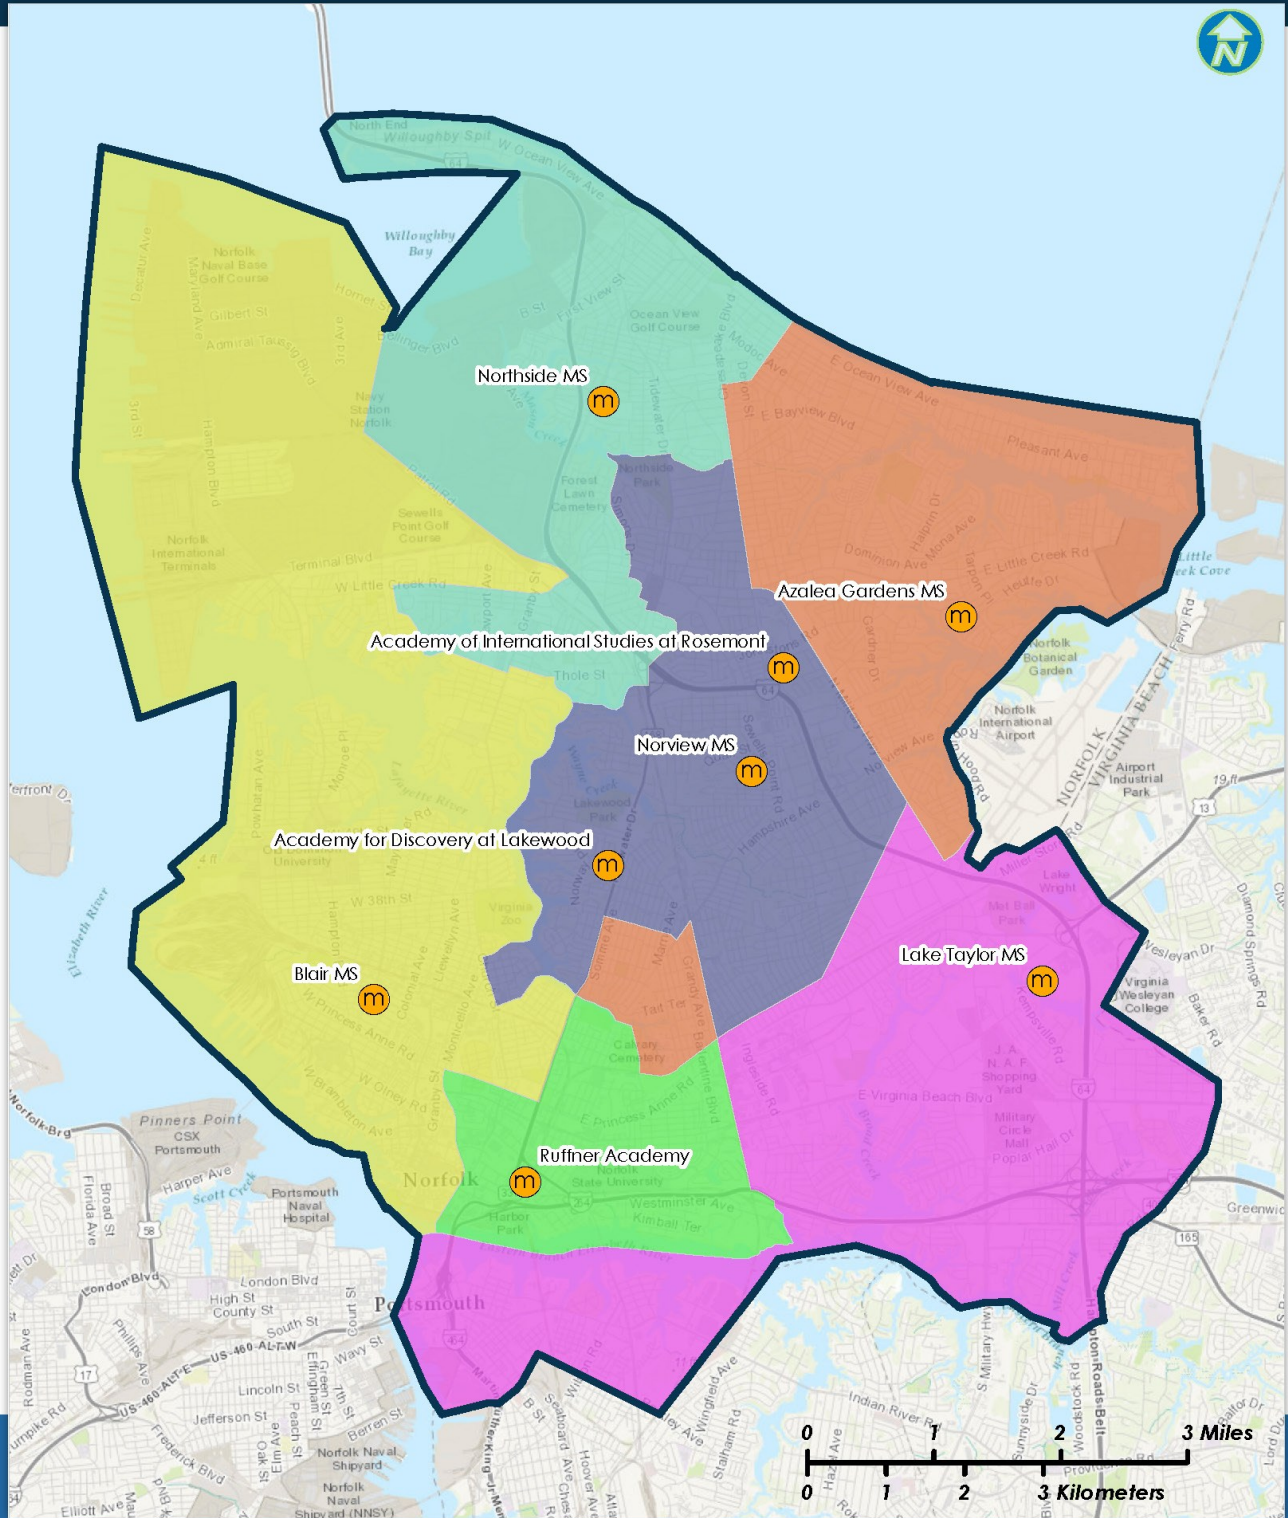

# Norfolk Public Schools Elementary Attendance Boundaries, SY 2017-18

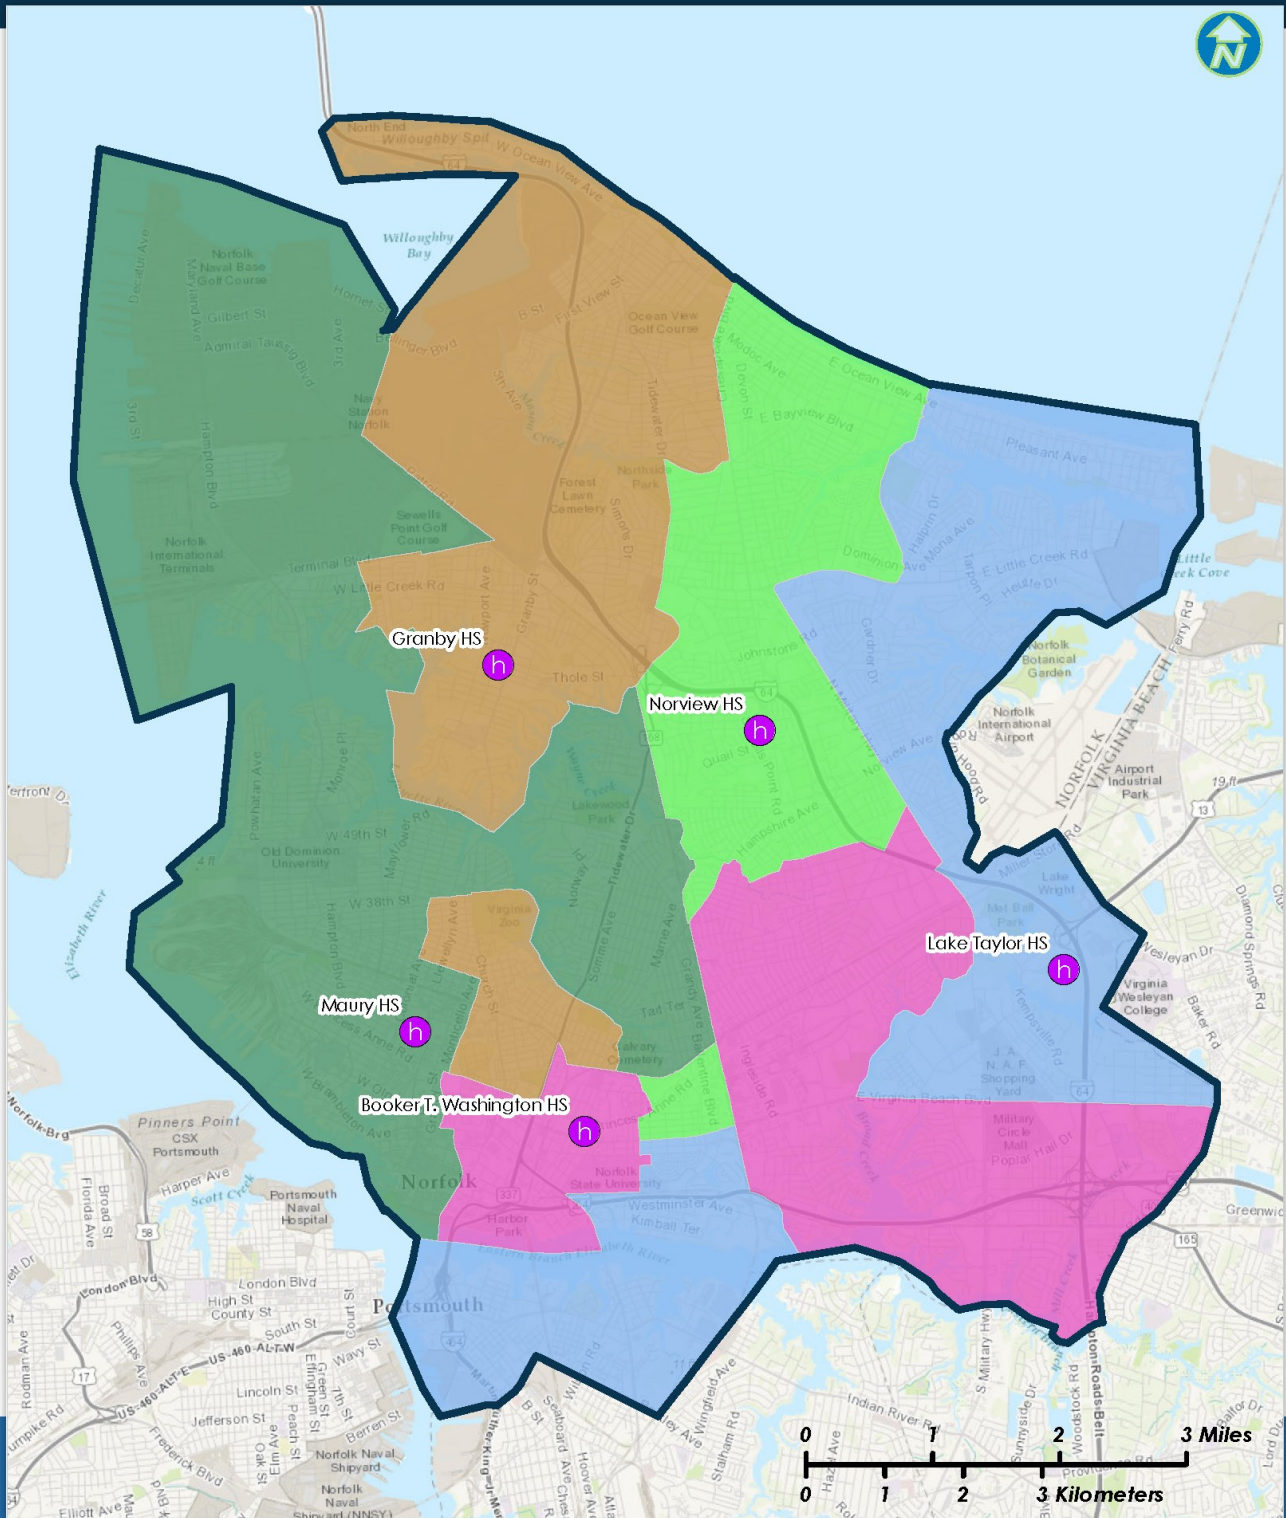

# Norfolk Public Schools Middle School Attendance Boundaries, SY 2017-18

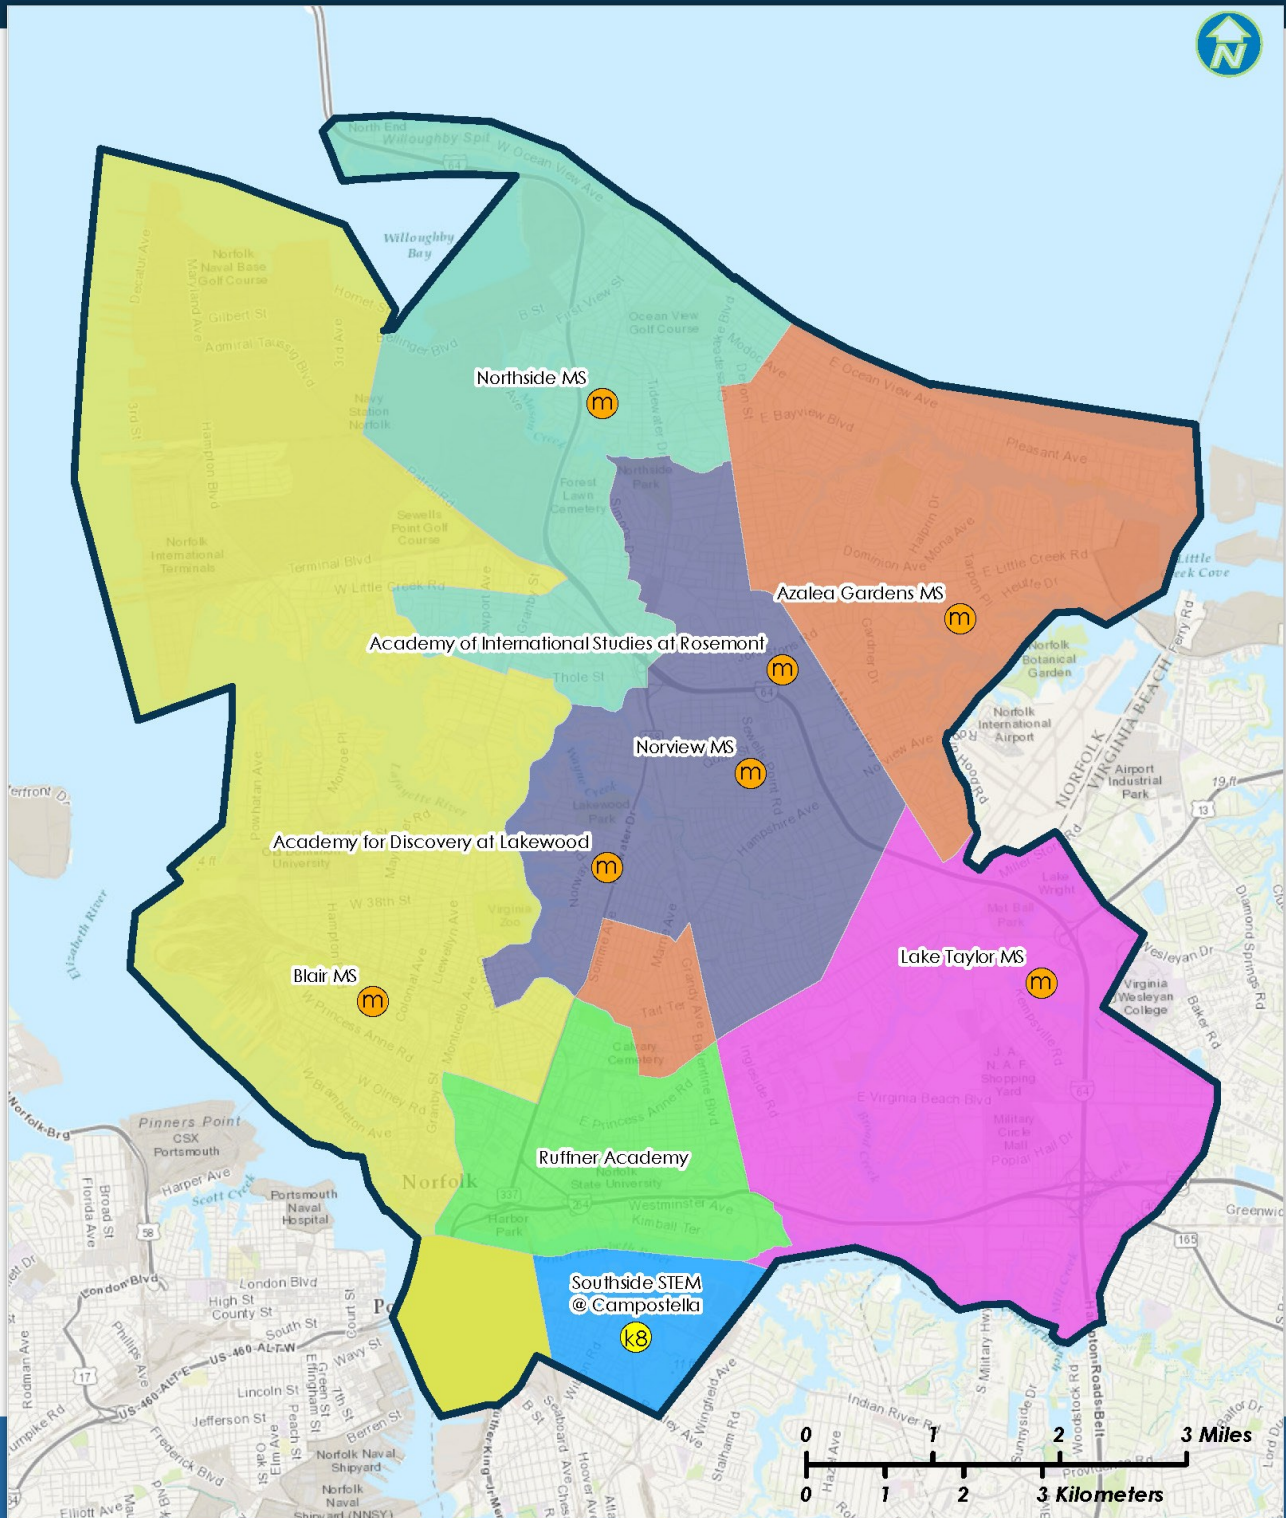

# Norfolk Public Schools High School Attendance Boundaries, SY 2017-18

# Norfolk Public Schools Middle School Attendance Boundaries, SY 2018-19

# HOUSING DATA

Housing development and building permits are tracked to determine their effect on student enrollment. The table and charts below illustrates the number of single and multi-family building permits issued in Norfolk, Virginia since 2000.

It should be noted that there is major re-development occurring in the Division on areas of dense housing that may impact future enrollment. Enrollment should be closely monitored.

## BUILDING PERMITS NORFOLK, VA

Year	Single-Family	Multi-Family
2000	177	110
2001	227	181
2002	276	341
2003	437	334
2004	382	387
2005	526	657
2006	351	194
2007	313	36
2008	257	564
2009	165	422

## LIVE BIRTH DATA

Utilization of live birth data is recommended when projecting future kindergarten enrollments. This data provides a helpful overall trend. Large bubbles in birth counts, either up or down, can also be planned for or anticipated by the Division.

In addition, the live birth counts are used in determining a birth-to-kindergarten and birth-to-first grade survival ratio. This ratio identifies the percentage of children born in a representative area who attend kindergarten and first grade in the Division five and six years later. The survival ratios for birth-to-kindergarten, birth-to-first grade, as well as grades 1-12 can be found on the following page.

Data is arranged by the residence of the mother. For example, if a mother lives in Norfolk but delivers her baby in Virginia Beach, the birth is counted in Norfolk. Live birth counts are different from live birth rates. The live birth count is simply the actual number of live births. A birth rate is the number of births per 1,000 women in a specified population group.

The table and graph includes the resident live birth counts for Norfolk, Virginia.

**RESIDENT LIVE BIRTH COUNTS  
NORFOLK**

Year	# of births
2002	4,119
2003	3,942
2004	4,094
2005	4,097
2006	4,036
2007	4,159
2008	4,088
2009	3,842
2010	3,791
2011	3,718
2012	3,773
2013	3,705
2014	3,620

NORFOLK**

# SURVIVAL RATIOS

The chart below demonstrates the ten-year changes in enrollment as students move through the system. Percentages greater than 100 indicate that there are more students than there were in the previous grade the previous year. In other words, there was an increase in student population where new students were added to the system. Percentages less than 100 indicate that there was decline or students left the system. If the exact number of students in 1st grade during the 2010-11 school year were present in 2nd grade for the 2011-12 school year, the survival ratio would be 100 percent.

Birth-to-Kindergarten and Birth-to-First Grade: This ratio indicates the number of children born in the area who attend kindergarten and first grade in the Division five and six years later. What is important to note is the trend in survival ratios, not necessarily the actual number.

The following table illustrates the historical survival ratios in the Norfolk Public Schools over the past ten years by grade level.

Survival Ratios - District-wide

from	to	Birth to K	K to 1	Birth to 1	1 to 2	2 to 3	3 to 4	4 to 5	5 to 6	6 to 7	7 to 8	8 to 9	9 to 10	10 to 11	11 to 12

## NORFOLK PUBLIC SCHOOLS HISTORICAL ENROLLMENT

As indicated in the table below, over the past ten years, PK-12 student enrollment in the Norfolk Public Schools has decreased by 3,741 students, or approximately 11 percent. It should be noted that the historical enrollment tables represent students who live within a particular school boundary and is not reflective of the official enrollment counts submitted to the Virginia Department of Education.

### Historical Enrollment - District-wide

Grade	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18
PK	2,209	2,298	2,336	2,372	2,182	2,288	2,163	2,167	2,046	1,923

**HISTORICAL ENROLLMENT -  
DISTRICT-WIDE**

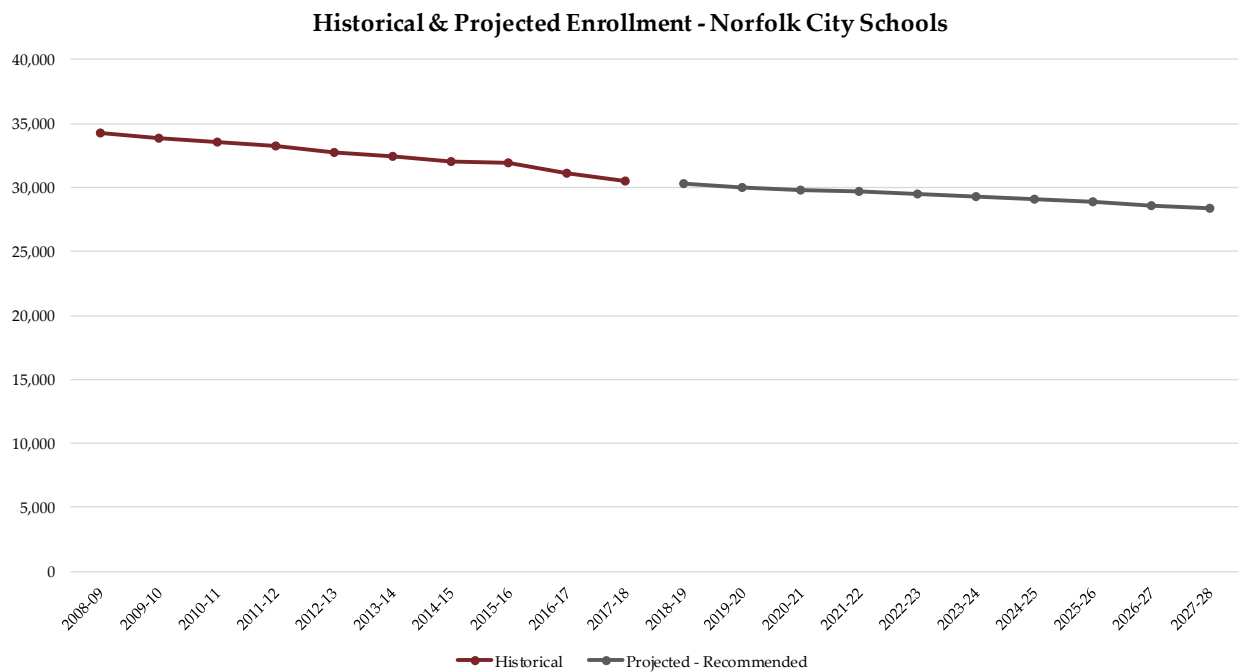

# PROJECTED ENROLLMENT

Cooperative Strategies developed enrollment projections for the Norfolk Public Schools based on students living within school boundaries.

It should be noted that projected PK enrollment reflects the current, 2017-18 (fall), enrollment of 1,923 and was not developed using the cohort survival method.

## NORFOLK PUBLIC SCHOOLS PROJECTED ENROLLMENT – RECOMMENDED

Based on the recommended projected enrollment, the student enrollment in the Norfolk Public Schools is projected to decrease from 30,503 students in 2017-18 to 28,366 students in 2027-28.

## CONCLUSION

As with any projection, the Division should pay close attention to live birth counts, enrollment in elementary schools, open enrollment, non-public enrollment, in / out migration patterns, and any housing growth. It is recommended that this document be reviewed on an annual basis to determine how more recent growth and enrollment trends will impact the enrollment projections.

Cooperative Strategies is pleased to have had the opportunity to provide the Division with enrollment projection services. We hope this document will provide the necessary information to make informed decisions about the future of the Norfolk Public Schools.
