# Snap&Read

- Open the Snap&Read program.

- A compass will appear with an arrow next to it.

- Click the compass to activate the crosshair feature.  Capture the text to be read completely in the box.

- The text will automatically be read as long as it is input as actual text and not an image of text.

- Click the speaker to pause speech or play again.

- Customize the program by clicking on the arrow and then the cogwheel.

Turn on or off speech

Open preferences

Close program

- Select tabs to change preferences.
