

Solar Eclipse 2024

Directions: Read the text below or have an adult read it to you.

A solar eclipse is when it looks dark in the middle of the day! The Moon moves in front of the Sun, blocking the Sun's light from Earth's view. You should never look directly at the Sun, — not even during a solar eclipse when the Moon blocks the sunlight! A solar eclipse is exciting. But looking at the Sun is dangerous. It can damage your eyes.

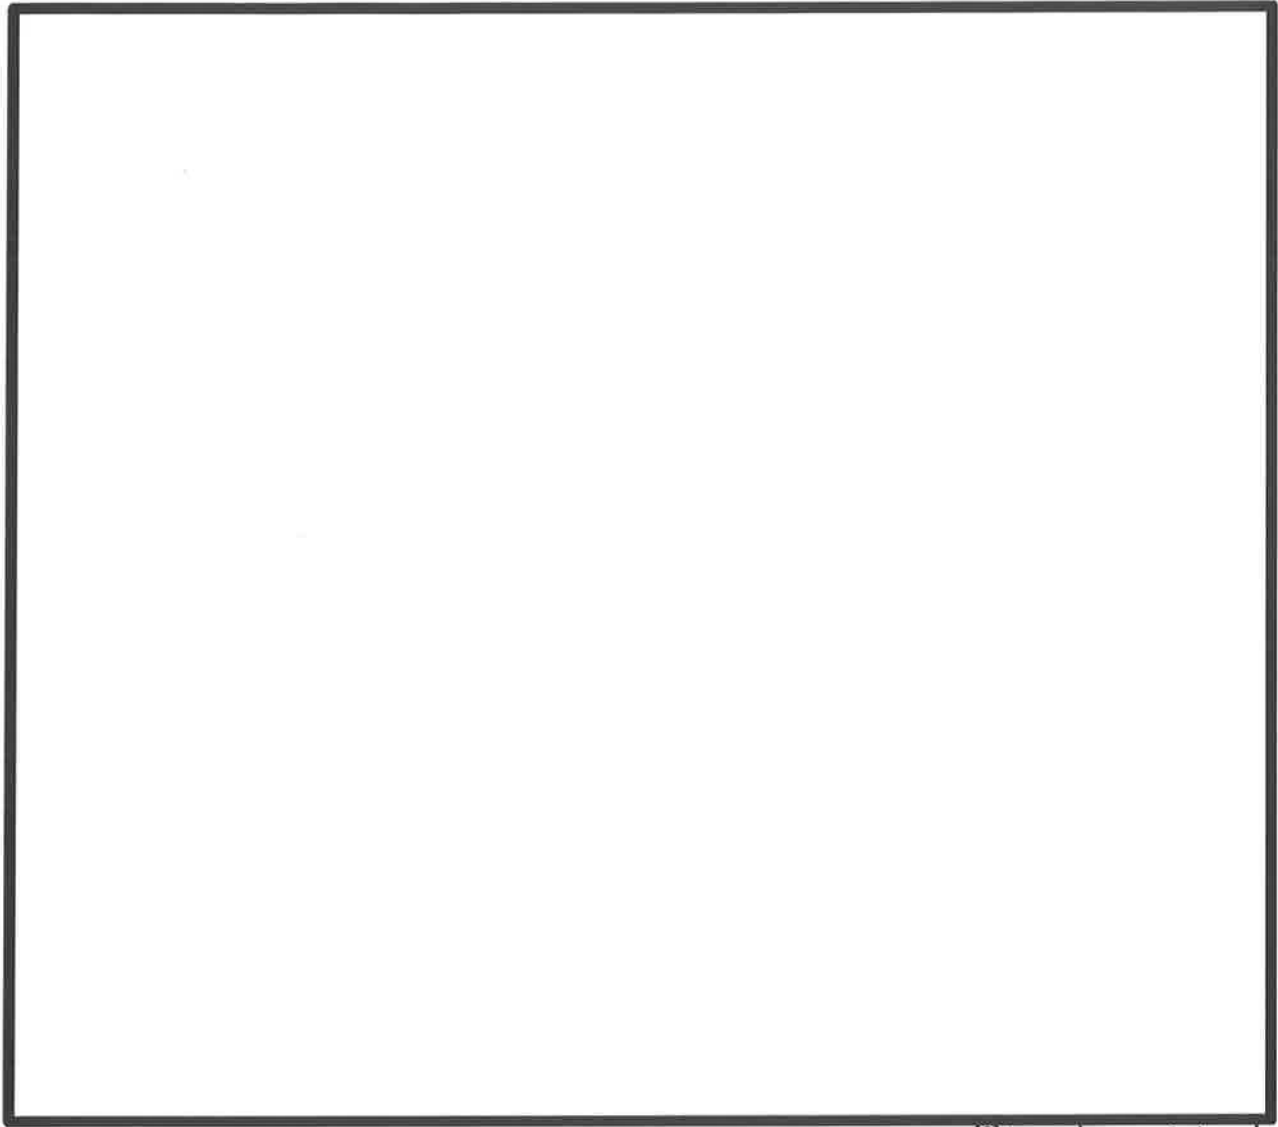

Name: _____

SOLAR ECLIPSE

Draw a solar eclipse. Cut and paste the words to make a sentence.
